Yaroslav Melnychenko

Senior Software Engineer, Frontend | React, TypeScript, JavaScript (ES6+), Node.js | 9+ years

Europe / Remote / B2B | +359 88 427 1856 | yasha271828@gmail.com | linkedin.com/in/yaroslav-melnychenko-b84076150

Summary

Senior Software Engineer with 9+ years of experience building user-facing web applications. Expert in React and TypeScript with Redux Toolkit and MobX state management, LESS/SASS and modern ECMAScript, plus the backend skills to ship features end to end: Node.js, REST APIs, MongoDB and PostgreSQL. Built a company-wide authentication layer on Keycloak (OAuth2 / OpenID Connect) and a custom design system with Storybook on Radix UI, shadcn/ui and Tailwind CSS.

Strong design sensibility and attention to detail: works side by side with product designers to turn designs into polished, reliable interfaces. Owns features end to end, gives and receives code review feedback, and works closely with product managers, DevOps and customers. Uses AI coding tools (Claude Code, Cursor, Codex, GitHub Copilot) in daily development. MSc in Mathematics (Honors).

Skills

Frontend: React, TypeScript, JavaScript (ES6+), Redux, Redux Toolkit (RTK), MobX, TanStack Query, Zustand, Next.js, LESS, SASS/SCSS, Tailwind CSS, HTML5, CSS3, Radix UI, shadcn/ui, Ant Design, Material UI, Storybook, design systems, Webpack, Vite, React Native

Backend: Node.js, Express.js, NestJS, REST APIs, MongoDB, PostgreSQL, MySQL, Elasticsearch

Auth and Security: Keycloak, OAuth2, OpenID Connect, role-based access control, multi-tenancy, protected routes, token handling

Tools and Cloud: Linux, AWS, Docker, Kubernetes, continuous deployment (GitHub Actions), Git

Testing and Quality: Jest, Vitest, React Testing Library, Playwright, code reviews, performance optimization (code splitting, bundle analysis)

AI Tools: Claude Code, Cursor, Codex, GitHub Copilot, LLM integration

Work Experience

Senior Full Stack Engineer - IVIX

Aug 2023 - Present | Europe / Remote

AI-driven financial intelligence platform that helps government tax authorities identify undeclared business activity and close the tax gap.

Stack: React, TypeScript, Redux Toolkit, Tailwind CSS, LESS/SASS, Radix UI, shadcn/ui, Storybook, Node.js, Express.js, NestJS, MongoDB, Elasticsearch, Keycloak, AWS, Docker, Kubernetes, Git

- Built the company's authentication and authorization layer from scratch on Keycloak (OAuth2 / OpenID Connect): a single identity provider adopted across all company applications, covering organization-level multi-tenancy, role-based access control, protected routes and token handling across the React clients and backend services, plus a branded login and account experience built with Keycloakify.
- Built a custom design system and Storybook component library on Radix UI, shadcn/ui and Tailwind CSS, and moved existing screens onto it, working closely with the design team to turn designs into production-ready components. Earlier migrated the UI layer from Material UI to Ant Design.
- Owned the platform's app-loading performance work: profiled the bundle with webpack-bundle-analyzer, introduced route-level code splitting and removed redundant and unused dependencies, cutting cold-load transfer by roughly 60%. Validated the gains with QA through automated clean-cache runs.
- Delivered core product features end to end with React, TypeScript and Redux Toolkit: new pages, data-heavy tables with server-side filtering and pagination, and the REST endpoints behind them.
- Wrote backend services in Node.js with Express.js and NestJS, including Elasticsearch aggregation queries powering the platform's analytics and reporting views, and Python (FastAPI) endpoints.
- Mentored mid-level developers and ran code reviews across the frontend codebase, setting the conventions for the design system and authentication layer, and ran knowledge-sharing sessions on the new component library.
- Worked as the connective point between design, product and DevOps: shaped requirements with product managers and customer-facing stakeholders and coordinated build, environment and deployment configuration for the React clients.
- Integrated AI-assisted tooling (Claude Code, Cursor, Codex, GitHub Copilot) into day-to-day development, covering code generation, review and refactoring, and shared the practices with the team.

JavaScript Developer - Scanovate

Jul 2019 - Aug 2023 | Europe / Remote

Client life-cycle and identity management platform for monitoring a compliant client identity across customers, citizens and businesses. Key frontend developer across four products: B-Trust console, Documents portal, On-boarding Client and a form render library.

- Developed React components and modules: dashboards handling large data volumes, a drag-and-drop workflow and mobile interaction builder, authorization flows and a form builder for administrators, with Redux state management.
- Built Node.js API services with Express.js and MongoDB, covering server-side application logic; integrated and aggregated third-party APIs.
- Improved the functionality and performance of existing company products.

JavaScript Developer - CHI Software

Feb 2018 - Jul 2019 | Kyiv, Ukraine

- Developed and maintained three products: Screen-life (interactive web video player), Legal Maps (crowd-sourced research service covering stocks, asset classes, ETFs and investment strategies) and Solicitor (SPA for a law school), building UI components and single-page applications.
- Worked within a cross-functional team of frontend and backend developers, QA engineers and a project manager.

Full Stack Developer - WEBKITCHEN-DESIGN

Jan 2017 - Jan 2018 | Kyiv, Ukraine

- Built custom WordPress themes end to end: markup, theme integration, backend functionality in PHP and admin configuration (categories, taxonomies, plugins), delivering client sites from design hand-off to launch.

Education

Master's Degree in Mathematics (Honors)

National Pedagogical University named after M. P. Drahomanov | Kyiv, Ukraine | Sep 2016 - Jun 2018

Bachelor's Degree in Mathematics and Computer Science

National Pedagogical University named after M. P. Drahomanov | Kyiv, Ukraine | Sep 2012 - Jun 2016

Languages

English - Upper-Intermediate (B2+) | Ukrainian - Native
